

EXHIBIT B

**IN THE UNITED STATES DISTRICT COURT
FOR THE WESTERN DISTRICT OF PENNSYLVANIA**

PROMINENT GMBH, <i>et al.</i> ,)	
)	
Plaintiffs,)	CIVIL ACTION NO. 2:16-cv-01609-LPL
)	
vs.)	The Honorable Lisa Pupo Lenihan
)	
PROMINENT SYSTEMS, INC., <i>et al.</i> ,)	
)	
Defendants.)	

**DECLARATION OF CHRISTIAN W. LIEDTKE IN SUPPORT OF PLAINTIFFS' BRIEF IN
OPPOSITION TO DEFENDANTS' MOTIONS TO DISMISS THE COMPLAINT FOR LACK
OF PERSONAL JURISDICTION PURSUANT TO FEDERAL RULE OF CIVIL
PROCEDURE 12(b)(2) AND 12(b)(3) AND TO TRANSFER PURSUANT TO 28 U.S.C. §§
1404, 1406 AND 1631**

I, Christian W. Liedtke declare as follows under penalty of perjury:

1. I am one of the attorneys for Plaintiffs Prominent Fluid Controls, Inc., Prominent GmbH and Prominent Systems spol. s r.o in this case.
2. Unless otherwise stated, the facts set forth in this declaration are based on my personal knowledge or present understanding. I would competently testify as to these facts if called upon to do so.
3. Defendants are not a small business. In fact, on at least one of their websites, <http://prominentinc.com/contact-us/>, as well as elsewhere, Defendants emphasize that they operate through a “Western Division”, a “Central and Eastern Division” as well as their headquarters. This information is in line with documentation submitted together with the Complaint. Specifically, Exhibit 7 to the Complaint contains a full PDF capture of www.prominentinc.com as of 01/05/2016 and p. 66 of that Exhibit shows that at that time too Defendants operated through multiple divisions. (ECF No. 1-1 p. 66).
4. Defendants operate through a corporate structure that includes at least four

regional business entities as well as their use of a “Western Division” and “Central and Eastern Division” in addition to their headquarters.

5. Based for example on their respective websites located at www.prominentinc.com and www.prominentsupplies.com, it is clear that Defendant Prominent Systems, Inc. and Defendant Prominent Supplies, Inc. utilize the same telephone number.

6. Defendant Ky Tran is the key individual behind all of these entities and holds the key officer and director positions for all of these entities. Respective evidence is contained in Exhibits 5-6 to the Complaint, ECF No. 1-1, p. 49-61.

7. Opposing Counsel states in his Declaration that Exhibit 7 thereto “is a true and correct copy of an email exchange between this Declarant and counsel for Plaintiff on October 31, 2016.” (Declaration of Alan J. Romero, Esq., paragraph 24). That statement is false.

8. Exhibit 7 to Mr. Romero’s Declaration does not contain several of the emails Mr. Romero sent to the undersigned on that day and as part of counsels’ one and only “email exchange” that day.

9. A true and correct copy of counsels’ email exchange from 10/31/2016 is attached hereto as Exhibit B-1.

10. Unfortunately, Mr. Romero’s emails from 10/31/2016 are in line with counsel’s prior communications. Specifically, on 08/19/2016, after receiving Plaintiffs’ follow-up correspondence of that same day, Mr. Romero wrote: “I understand that you sent a very low class letter to my office. I will deal with it next week when I return. Thank you for your professional and courteous attitude. Alan”

11. Mr. Romero’s respective email can be found at p. 30 of Exhibit 2 to the Complaint.

12. The allegedly “very low class letter” can be found at pp. 16 - 28 of Exhibit 2 to the Complaint.

13. Notably, Mr. Romero did not follow-up as promised and left Plaintiffs with no other choice but to file the Complaint in this action.

14. Exhibit 2 to the Complaint catalogs Plaintiffs' repeated attempts to resolve this matter amicably.

15. Unfortunately, Defendants did nothing but delay and showed no interest in an amicable resolution.

16. Their 10/31/2016 "meet and confer letter" is a further example of Defendants delay tactics.

17. That letter was sent after Plaintiffs' had provided Defendants' counsel with an informal copy of the Complaint as file in this Court and once more indicated Plaintiffs' interest in resolving this matter amicably.

18. A true and correct copy of Plaintiffs' letter sent together with the informal copy of the Complaint is attached hereto as Exhibit B-2.

19. Rather than so much as mention an amicable resolution, Defendants sent their 10/31/2016 "meet and confer letter".

20. Defendants use metatags and other search engine optimization techniques in their website.

21. Metatags are designed to induce internet search engines to display a website more prominently than others, when an internet user enters a search query that contains the terms used by the website owner as metatags.

22. Amongst others, Defendants use the word PROMINENT as a metatag.

23. True and correct copies of metatag reports created by the undersigned using <http://www.seocentro.com/tools/search-engines/metatag-analyzer.html> on 12/11/2016 are attached hereto as Exhibit B-3.

24. The bottom of Defendants' website www.prominentinc.com contains a hyperlink to Defendants' marketing agency SevenDesignAvenue or 7DA. (*See also* Exhibit 7 to the Complaint, p. 64)

25. On their website, <http://7designavenue.net>, that marketing agency prides itself in their local search engine optimization techniques.

26. Defendants' marketing agency is located in Houston, TX rather than California.

27. Defendants claim that they have "co-exhibited at tradeshows" with Plaintiffs for at least 10 years.

28. A true and correct copy of an email from Opposing Counsel containing that statement is attached hereto as Exhibit B-4.

29. More than 300 attendees at this year's Annual Conference of the American Waterworks Association were from Pennsylvania.

30. A true and correct copy of the attendee list for this year's Annual Conference of the American Waterworks Association is attached hereto as Exhibit B-5.

31. I personally entered the pertinent information to create the chart shown on p. 26 of Plaintiff's Opposition to Defendants' Motion to Dismiss by entering the address information shown in Exhibit B-6 hereto into Google Maps or, where Google Maps was unavailable, using the distance function of the Google search engine as shown in Exhibit 6 hereto.

32. Defendants have advertised in Water Quality Products magazine.

33. A true and correct copy of one such advertisement is attached as Exhibit B-7 hereto.

34. The media kit provided by the publisher of Water Quality Products magazine states that the magazine has more than 25,000 subscribers, 76.5 % of which have "buy/ spec/purchase authority".

35. A true and correct copy of the Water Quality Products magazine media kit is attached hereto as Exhibit B-8.

36. Litigating in the Western District of Pennsylvania will be cheaper for all parties involved than litigating in Defendants' desired forum, the Central District of California.

37. The Business Travel News 2016 Corporate Travel Index for example ranks Los Angeles, Defendants desired venue as the seventh most expensive US city to stay in. Conversely Pittsburgh is ranked No. 34 of 50 in its Hotel Cost Breakdown. Based on this Business Travel News study, hotel prices are on average 20% cheaper in Pittsburgh than in Los Angeles.

38. A true and correct copy of this study is attached hereto as Exhibit B-9.

39. Los Angeles, where the Central District of California has its main seat and where Defendants request this case be litigated, has been ranked as the worst metropolitan area in terms of traffic repeatedly. Pittsburgh and Allegheny County do not even make this ranking.

40. A true and correct copy of a respective article published in the Los Angeles Times referencing a respective study is attached hereto as Exhibit B-10.

41. The most recent Federal Judicial Caseload Statistics show that in 2015 14390 new civil actions were filed in the Central District of California and 9922 civil actions were pending in that court. In the same time frame 2624 civil actions were filed in this Court and 1827 civil actions were pending. These are differences of 448% and 443% respectively.

42. A true and correct copy of the most recent Federal Judicial Caseload Statistics is attached hereto as Exhibit B-11.

43. All three declarations submitted by Defendants claim in identical or nearly identical wording that Plaintiffs “originally [sought] redress under the laws of California (and within California)...” (*see e.g.* Romero Declaration, paragraph 3). That statement is incorrect.

44. Plaintiffs’ correspondence beginning with its cease and desist letter sent on company letterhead contained a reservation of rights, an indication that Plaintiffs did not intend to catalog all possible causes of action and most importantly raised claims under Pennsylvania state law as well as other state laws.

45. A true and correct copy of Plaintiffs’ respective correspondence was attached to the Complaint as Exhibit 2.

46. Based on my own research of Defendants’ activities, it is clear that Defendants seek to make sales, make sales, and operate on a national and even international level.

I have consulted with my outside trademark specialist.

As a direct result of your unprofessional and obstreperous conduct and comport, this email shall serve as notice that Prominent Systems, Inc. shall be filing for a protected mark with the United States Patent and Trademark Office in the same class as your client(s).

Go explain that to your clients. Too bad they hired an attorney who has absolutely refused to participate in any meaningful dialogue regarding this matter. I will ensure that you are served with the application upon (imminent) filing so that you have an opportunity to appear in the USPTO action so that the mark can be cancelled to render your clients' mark moot.

Very poor manners on your part.

Alan

On Mon, Oct 31, 2016 at 7:59 PM, Alan J. Romero <ajr@romerolaw.com> wrote:

Sounds like you've already made up your mind. Further, the fact that you spent less than 20 minutes researching about 50-plus cases reeks of bad faith, and I will be bringing your refusal to meet-and-confer to the court's attention. You clearly didn't read it, and given the shrill tone of the Complaint you are being completely unreasonable and have no interest in the dutiful execution of your duties and obligations as an officer of the court.

Further, your less than 24 hour deadline is uncivil, unprofessional, and impractical. Your conduct is *Smith v Ricks* personified.

I hereby demand a thorough and good-faith response to my meet-and-confer letter of this date. Your unilateral and unreasonable deadline is disregarded out of impossibility. I have already associated specialized Trademark counsel to seek cancellation of your clients' marks, so in addition to the motions to dismiss, motion to transfer, and motion for sanctions, it is incumbent upon me to advise you that our firm will be seeking cancellation of the mark through ancillary action through the USPTO which may result in an additional stay in the action.

I would ask you to meet-and-confer regarding the stay, but you are both unable and unwilling to. I will not respond to you any further after work hours. I will be enjoying a holiday dinner and wish you the best.

Alan-

It is clear from your correspondence, that your client(s) are not interested in an amicable resolution of this matter.

Your correspondence and prior statements are ambiguous as to the question whether you are authorized to accept service of the Complaint as filed in the Western District of Pennsylvania on behalf of all three Defendants.

Please clarify by no later than **12:00PM PST tomorrow, November 1, 2016**. If we do not hear from you by that time, we will have no choice but to serve the Complaint on the Defendants directly.

Best,

—Christian

Re: Trademark Infringement; Unfair Competition

Mark: PROMINENT

Our Ref: PROMI-0002

Dear Mr. Romero:

As you are aware, this firm represents Prominent Fluid Controls, Inc. and Prominent GmbH in intellectual property matters. We revert to our previous correspondence concerning this matter. As you are also already aware, we sent letters to your clients on June 28, 2016 (on our clients' company letterhead) and to you on July 20, 2016 and August 19, 2016 regarding Prominent Systems' unauthorized use of our clients' PROMINENT trademarks.

The June 28, 2016 letter as well as our subsequent letters explained how this unauthorized use constitutes direct, flagrant, and willful infringement and dilution of our clients' valuable registered and unregistered trademark rights as well as unfair competition in violation of federal and state laws.

Due to the importance of this matter, the June 28, 2016 letter requested a response by July 15, 2016. Our July 20, 2016 letter extended the response deadline until July 29, 2016. After conferring with you that deadline was further extended until August 16, 2016 as per your request. Upon your request, the deadline was then extended again until August 22, 2016.

Yet, to date, two months after the final deadline you proposed, we have still not received your response and proposal for an amicable resolution. Prominent Systems' consistent failure to respond to our letters over the last year, not even meeting your own, self set, deadlines, would appear to indicate that Prominent Systems has no desire to amicably resolve this important matter. Accordingly, our clients have filed the enclosed complaint against Prominent Systems in the United States District Court for the Western District of Pennsylvania.

Please note that we have provided you with the enclosed copy of the complaint as a courtesy and as a final opportunity for Prominent Systems to cease its unauthorized use of our clients' registered PROMINENT trademarks and to avoid the cost of litigation.

While our clients would prefer to resolve this matter amicably, we must insist that you provide a full response to this letter by no later than **Friday, October 28, 2016**. Alternatively, our clients will have no choice but to serve the complaint and seek relief through the court.

Very truly yours,

Christian W. Liedtke
Attorney at Law

Title:	Home - Prominent Suplies Inc
Description:	Prominent Supplies, Cleaning supply, soap, Tissue paper, Towel paper, Gloves, janitorial service, cleaning service and much more
Keywords:	cleaning,supply,supplies,tissue,gloves,latex,soap,prominent,paper,towel,janitorial,service
Author:	Prominent Supplies

Meta tags analysis.

Title:	Webpage has a title.
	The title is an important factor in the on-site search engine optimization. For best practice make use of your main keywords in the title.
Title Length:	Title is smaller than 60 characters (28 characters).
	The title of your page has a length of 28 characters. Most search engines will truncate titles to 60 characters.
Title Relevancy:	Title relevancy to page content is good.
	The Title relevancy to page content is 75%.
Description:	Webpage has a description.
	The description is an factor in the on-site search engine optimization. For best practice describe where your webpage is about in the description.
Description Length:	Description is greater than 80 and smaller than 160 characters (128 characters).
	The meta description of your page has a length of 128 characters. Most search engines prefer an meta descriptions between 80 and 160 characters.
Description	Description relevancy to page content is very poor.

Relevancy:	The Description relevancy to page content is 12%.
Keywords:	Webpage has a keywords meta tag. The keywords meta tag is obsolete, and no search engines does use the keywords meta tag in their web ranking nowadays.
Robots:	Webpage has no robots meta tag. Spider robots are allowed to index and follow urls from the webpage.
Twitter Card:	Twitter card is not used. With Twitter Cards, you can attach rich photos, videos and media experience to Tweets that drive traffic to your website.
Google Plus Publisher:	Publisher is not connected to Google Plus. The publisher of the page is not connected to your Google Plus account to define the author of this one.
Open Graph:	Open Graph is not used. The Open Graph meta tags is not used. The Open Graph protocol enables any webpage to become a rich object in a social graph. For instance, this is used on Facebook to allow any webpage to have the same functionality as any other object on Facebook.

EXHIBIT B-4

AJ

From: Alan J. Romero ajr@romerolaw.com
Subject: ProMinent adv. Prominent
Date: August 17, 2016 at 9:18 AM
To: cw.liedtke@acuminis.biz
Cc: Gabby Escamilla age@romerolaw.com

Mr. Liedtke,

First of all I would like to apologize for the brevity of this promised response. Unfortunately this past week my back decided that I have been working too much and rendered me homebound for several days. Resultantly, I have not conducted the in-depth research that I had hoped and expected to have completed before leaving for Cleveland for the remainder of the week. I do fully intend to more fully respond immediately upon my return on Monday.

Upon communicating with my client, essentially my questions/observations lie upon two distinct points. This is not to say that your client's claim is with or without merit, but merely my preliminary observations in determining whether to accede to the infringement claims and begin advising my client to commence planning for corrective measures, or not.

(1) It is unclear to me, on the face of the unfair competition/infringement claim, that our respective clients are necessarily marketing the same subclass of goods upon which the infringement claim rests. I have searched your client's website for the terms "carbon" or "activated carbon" and with zero results appearing it appears that the respective businesses do not have a material overlap in the subclass of goods specified. If your client has been utilizing the mark for the sale of carbon activated media consistent with the maintenance of the mark, please do so advise so that I may commensurately advise my own client of the implications of same.

(2) Prominent Systems has generated substantial goodwill over the past 10 years, and reports that they have co-exhibited at trade shows with your client for a similar period of time. Without steering the discussion towards an argument related to policing of the mark, an appropriate illustrator of my client's position is that both companies have enjoyed the value of their respective marks without overlap or prejudice to the intrinsic value of those co-existing and, I would respectfully argue, largely or entirely mutually exclusive marks.

Please advise how you would like to proceed. My client of course reserves all rights and remedies, but I would personally like to see some resolution rather than the outright litigation of the matter due to what I genuinely perceive as the mutual exclusivity of the use of the marks in commerce within the ambit of the respective (sub)classes of goods which form the crux of this dispute.

Best,
Alan

Alan J. Romero

EXHIBIT B-7

element in the same manner, so there is little opportunity to increase the systems' efficiency.

Attempts to increase efficiency have related to either adjustments in the size of reject flow controllers or modifications to ancillary components, such as storage tanks. Both options have advantages and disadvantages, but essentially attempt to mitigate the inefficiencies on the back end that are caused by the fundamental design of the RO element.

This lack of efficiency often is used as a selling point against RO systems. With competition in the filtration market, it can be difficult to make end users look beyond the wastefulness of RO to see its benefits, thus making it more challenging to sell RO systems over filtration technologies.

In order to accurately address the efficiency issues of RO membranes, manufacturers need to improve the distribution or flow of feedwater to the membrane without disrupting rejection performance or the daily production rate of the

element. The unnecessary additions of ancillary components, like storage tanks, are a disadvantage to dealers because they do little to reduce the amount of feedwater dispensed. New technology is most effective and easily embraced by the marketplace when it is packaged in a configuration that can easily be retrofitted into existing equipment while simplifying the development of new systems.

Necessity of New Technology

Faced with the challenge of increasing efficiency while maintaining the same membrane lifespan, manufacturers understand that any new technology must still provide water quality comparable to the existing membrane technology. Dealers deserve better technology that does not drive up margins or create additional, oftentimes unnecessary stages. Infusing new technology through minimal retrofit simplifies product differentiation in a highly commoditized, generic market, while lessening the

impact of costly disruptions (e.g., third-party certifications) to OEMs' existing systems.

However, such technology takes years to develop, because manufacturers want dealers to rest assured they are purchasing from companies that take a stance on integrity and produce well-engineered, reliable products, instead of taking shortcuts. Once perfected, the introduction of revolutionary technology to a decades-old market will help dealers and OEMs improve profitability and give them new reason to promote a standard product offering. **WQP**

WATER QUALITY PRODUCTS

Water Treatment Solutions for the Residential & Commercial Markets

Scranton Gillette Communications | www.wqpmag.com

The Solutions Resource

The Pluses Of Being Plus One

Just one extra inch in width has generated a lot of love from our readers and advertisers. As the only plus-one publication in the industry, Water Quality Products (WQP) delivers a fresh, clean look. Easier to read. Easier to tote. And for advertisers, more opportunity to present ad messages in an airy, uncluttered presentation. We love it, too.

Faces of the Industry

In spring 2017, WQP reprises this bonus issue that highlights family dealerships and emerging young professionals – the industry shapers and trendsetters.

The WQP Difference

25,039¹

WQP qualified subscribers – the largest industry reach with a single ad buy.

76.5%¹

of WQP subscribers have buy/spec/purchase authority.

21,142¹

WQP subscribers qualified within one year – more than 4x that of Water Conditioning & Purification (4,644²). WQP has the most up-to-date database, by far.

The Only BPA-Audited Industry Publication

A third-party audit like BPA verifies that WQP reaches the number of professionals we say it reaches and what purchase influence they have. BPA is the class of the publishing audit field. And in 2016, WQP became the ONLY BPA-audited publication in this industry.

49,036 Print + Digital Reach

If you're only advertising in print or digital media, you're missing out. Print + digital provides the widest reach and best return on your investment.

Source: Publisher's Data. Circulation fluctuates. These numbers were totaled in July 2016.

Commercial Water

WQP delivers extended reach in the commercial/institutional water segment with 9,400 WQP subscribers who have buy/spec/approval authority for plumbing/water systems.¹

Commercial	Dealer, Contractor, Distributor, Specifying Engineer, Manufacturer, Manufacturer/Supplier, Hotels/Restaurants, Healthcare Facilities
Distributor	POU/POE Distributor, Plumbing Wholesaler
Residential	Dealer, Contractor, Distributor, Retailer

¹ WQP Publisher's Data, 25,039 total qualified circulation (16,436 print, 8,603 digital)

² WC&P December 2015 BPA Statement, 16,927 unique total qualified circulation (15,618 print, 1,378 digital); resigned from BPA in 2016

Dominant Purchasing Authority

WQP independently audits its audience's purchasing authority for 16 product groups.

Look how many qualified decision-makers your advertised brand reaches in some of our key product groups.

Respondents with authority to buy, specify or approve these items¹

Total

Filters, Filtration Equip., Systems, Housings & Components	16,074

Editorial Mission

WQP is the preeminent source of information for water treatment professionals. Our purpose is to provide editorial content and information to help these professionals do their jobs more effectively while educating them on the latest technology. WQP provides editorial content in a variety of informative ways, both in print and electronic formats.

Rates effective November 1, 2016 | Published 13 times in 2017

General Advertising Rates

Color Rates: Based on frequency,¹ rate earned is determined by the number of insertions or different advertisements (regardless of size) placed in one or more issues within the 12-month contract period from date of first insertion. Each unit used in an ad composed of multiple units counts as an insertion toward earning a frequency rate. Advertising schedules composed of mixed space units (1/4-page or larger) are entitled to frequency rate for each unit with one exception. The exception is a mixed schedule in which the use of either the smaller units or smallest unit lowers the total cost of the campaign below the amount which the larger units taken alone would cost. Rate holders not acceptable.

Frequency Determination: To select the proper frequency for calculating your basic advertising rate for WQP, please add together the total number of insertions of 1/4 page or more in size that you plan to schedule in WQP within the same 12-month period.

Combined Frequency Rate: The total number of insertions of 1/4 page or more size that you plan to schedule for WWD and WQP within the same 12-month period will determine the frequency rate you will earn in each.

Prepay Program: Clients who prepay their entire contract by January 16, 2017 will receive an additional 8% discount on the cost of their program.

Space Unit	12x	9x	6x	3x	1x
Full Page	\$3,920	\$4,210	\$4,350	\$4,500	\$4,625
2/3 Page	\$3,300	\$3,540	\$3,675	\$3,790	\$3,910
1/2 Page	\$2,790	\$3,000	\$3,090	\$3,190	\$3,300
1/3 Page	\$2,250	\$2,400	\$2,470	\$2,560	\$2,645
1/4 Page	\$1,990	\$2,120	\$2,190	\$2,270	\$2,330
1/6 Page	\$1,740	\$1,850	\$1,920	\$1,980	\$2,040

Four-Color Rates

Color

2-color space cost minus \$500
 Black and White space cost minus \$1,000

Bleed

Rates for Bleed \$230 per page

Covers

Rates for Covers: Cover positions are all full pages and cannot be canceled. Covers are printed offset. For mechanical requirements, see AAAA-MPA. Total insertions of full and tabloid pages and covers determines rate earned.

Second Cover, earned B&W rate plus 15%
 Third Cover, earned B&W rate plus 10%
 Fourth Cover, earned B&W rate plus 20%

Special Positions

Rates for Preferred Positions (other than Covers) B&W rate plus 5%

General Regulations

Terms: Agency commission of 15% of gross billing for display advertising space, color, special position premium, provided account is paid within 30 days of invoice date. Agency commission will not be paid if the submitted ad material requires additional work by the publisher. 1 1/2% charge per month on accounts 30 days or more in arrears. No cash discount. Commission is not allowed on mechanical or special charges, including those for artwork, photos, printing, reprints, backup of inserts, tip-in and all other special handling requirements. In the event of non-payment, publisher reserves the right to hold advertiser and/or its advertising agency jointly and severally liable for such monies as are due and payable to the publisher.

Short-Rates and Rebates: Advertisers will be short-rated if, within the 12-month period from date of first insertion, they do not use the number of insertions contracted for upon which their billings have been based. Advertisers will be rebated if, within the 12-month period, they have used sufficient additional insertions to earn a lower rate than that at which they had been billed.

Rate Protective Clause: Rates are subject to change on notice and become effective for all advertisers with the stated specific issue and all issues thereafter. However, advertisers may cancel or amend their contracts without incurring short-rate adjustment if they have fulfilled their contract terms through the issue preceding that with which the new rates are effective.

Publishers' Copy Protective Clause: In consideration of the acceptance of any advertising from the advertiser and/or the advertising agency for publication at the rates set forth in this rate card, the advertiser and/or the advertising agency represents and warrants that all material delivered to the publisher for publication shall be free of libel and that publication thereof will not violate or infringe any copyright, trademark, right of

privacy, or any other statutory or common law property right of any person, and that the advertiser and/or the advertising agency will indemnify, defend and save harmless the publisher, its agents, assigns and successors against any claim, demand, costs, expenses and damages, including reasonable attorneys' fees incurred by the publisher, arising out of or in connection with any breach by the advertiser and/or the advertising agency of any of the foregoing.

Advertising That Simulates Editorial Content: Advertisements that in the opinion of the publisher resemble editorial material or the publication's editorial format will carry the word "Advertisement" in at least 10 pt. type at top or bottom.

Regulations Not Stated Elsewhere in Rate Card: See specific and detailed references in item No. 14 of this publication's listing in Standard Rate and Data Service (SRDS).

Classified Ads

Two changes per contract. Non-commissionable.

Mailing Instructions

Space contracts, insertion orders, correspondence, advertising material, proofs and copy should be addressed to Traffic Department, Water Quality Products, 3030 W. Salt Creek Lane, Suite 201, Arlington Heights, IL 60005-5025; 847.391.1005; F: 847.390.0408. Contact the Creative Services Department for insert instructions.

Ad Art Upload Instructions

To download instructions and additional ad information, visit www.adshuttle.com/sgc

Accepted Digital Formats

Press-optimized PDF using Acrobat Distiller's PDF/x-1a job option (300 dpi, CMYK color) is the required format. PDFs prepared for use on the Web are unacceptable. Unless a SWOP ad proof is submitted, publisher will not accept responsibility for the integrity of the ad.

Mechanical Data

Publication Trim Size: 9" x 10 3/4" by trimming 1/8" from all sides. Live matter should be kept at least 3/8" from the trimmed sides.

Printing: Web offset

Binding: Saddlestitched

Standard Unit Size in Inches: Spaces to be charged at standard unit rates can be used only in the forms and dimensions shown below. Unit exceeding size in any dimension is considered bleed or oversize, except for gutter bleed on two-page spread.

Mechanical Requirements: SWOP specifications apply.

Plus-One Ad Sizes

Publication Trim Size: 9" x 10 3/4"

Space Unit	Specification (width x height)	
	Non-Bleed	Bleed
Two-Page Spread	17 1/4" x 10"	18 1/4" x 11"
Full Page	8" x 10"	9 1/4" x 11"
2/3-Page Vertical	5 1/4" x 10"	5 3/4" x 11"
1/2-Page Spread	16 1/2" x 4 7/8"	18 1/4" x 5 1/2"
1/2-Page Vertical	3 7/8" x 10"	4 1/2" x 11"
1/2-Page Horizontal	8" x 4 7/8"	9 1/4" x 5 1/2"
1/2-Page Island	5 1/4" x 7 3/8"	—
1/3-Page Vertical	2 1/2" x 10"	3" x 11"
1/3-Page Square	5 1/4" x 4 7/8"	—
1/4 Page	3 7/8" x 4 7/8"	—
1/6 Page	3 7/8" x 2 1/2"	—

Live-Area: Keep all live matter 1/4" away from the trim on all four sides

Methodology

For *BTN*'s 2016 Corporate Travel Index, the 32nd annual, BCD Travel's Advito provided the average hotel and car rental costs paid by BCD corporate clients, *BTN* collected hotel taxes and surcharges from hotels, and eight New York University School of Professional Studies Advanced Research Seminar students, led by academic chair and clinical assistant professor Lynn Minnaert, called restaurants in October and November to gather meal prices. For U.S. cities with an annual gross domestic product above \$95 billion, researchers surveyed three chains, six independent restaurants identified via TripAdvisor and three hotel restaurants for breakfast. They called six chains and six independent restaurants for each lunch and dinner. For smaller cities, they surveyed two independent restaurants and one hotel restaurant for breakfast and three chains and three independent restaurants for each lunch and dinner. Sample chains for breakfast include Denny's, IHOP and Starbucks; for lunch Chili's, Applebee's, Panera Bread and Olive Garden; and for dinner LongHorn Steakhouse and Olive Garden. For non-U.S. cities with populations of more than 1.5 million, they surveyed 12 restaurants for each lunch and dinner, and for smaller non-U.S. cities, they called six.

An advertisement for United Airlines' free Wi-Fi service. The text 'WITH FREE WI-FI*' is prominently displayed in large white letters. Below it, a smaller line of text reads '*10 MB free on select aircraft, limited to 2 hours'. To the right, there is a photograph of a man sitting in an airplane seat, looking down at his phone. The overall background is dark and moody.

Los Angeles area can claim the worst traffic in America. Again

Rush-hour traffic crawls through Los Angeles, which researchers say has the worst traffic in the country. (Luis Sinco / Los Angeles Times)

By **Laura J. Nelson**

MARCH 15, 2016, 5:28 PM

Southern California has, yet again, clinched the dubious distinction of having the country's worst traffic.

Drivers in the Los Angeles-Long Beach-Santa Ana region spent 81 hours idling on freeways in 2015, the worst cumulative delay of any U.S. metropolitan area, according to a study released Tuesday by the

Los Angeles area can claim the worst traffic in America. Again - LA Times

data company Inrix.

[Angelenos weigh in: L.A. traffic is literally the worst >>](#)

The findings should come as no surprise to Angelenos. Traffic remains the top concern for Southern California residents, topping personal safety, housing costs and retirement savings, according to a recent Los Angeles Times poll.

"This validates what people are experiencing," said Herbie Huff, a research associate at the UCLA Institute of Transportation Studies. Still, she added, "it's important to recognize that congestion is a sign of good things."

Although it's little comfort for those stuck behind the wheel, researchers have long said that heavier traffic is a sign of a healthier economy. Typically, congestion levels dip during recessions because fewer people have jobs.

When the economy roars back, so does traffic. Americans drove a record 3.15 trillion miles last year, shattering the previous record of 3 trillion miles in 2007, according to federal estimates.

The Greater L.A. area has four of the world's most-congested freeway segments: the southbound 101 Freeway between Topanga Canyon Boulevard and Vignes Street; the 5 Freeway between Highway 133 in Orange County and Olympic Boulevard in Los Angeles; the 10 Freeway between the city of Santa Monica and Alameda Street; and the northbound 101 Freeway between the 60 Freeway and Haskell Avenue.

The 101 southbound sees the worst delays of any freeway in Los Angeles. On Wednesdays at 8 a.m., the most congested period, drivers move an average of 17 mph and spend 58 minutes longer in their cars than they would if traffic were free-flowing. Drivers on that section of the 101 spend 134 hours per year — about 5 1/2 days — waiting in traffic.

The hour of the week with the worst congestion was 4 p.m. Friday, when six of L.A.'s 25 most congested roads recorded their most sluggish hour.

The study did not include surface streets.

In San Francisco and Washington, the second-worst places to commute by car, drivers wasted about five fewer hours than in Los Angeles last year.

NEWSLETTER: Get essential California headlines delivered daily >>

Over the next few years, if gas prices remain low and the economy stays strong, drivers in L.A. and other major cities should expect congestion to increase, said Chris Handley, Inrix's vice president of product and analytics.

Aside from an economic downturn, the only way traffic will get better is if policymakers charge drivers to use the roads, UCLA's Huff said.

"Running a rail line parallel to a congested freeway might result in some of the drivers switching to the rail line," Huff said. "But even if that happens, the new space that you've freed up on the freeway will just be filled up again by new drivers — people who had been dissuaded from driving because the traffic was bad."

Still, some transportation researchers say the advent of the autonomous car over the next 10 to 15 years could slow, or even stop, congestion's slow creep upward.

Driverless cars are billed as more efficient than human drivers, in part because robot drivers require less space between vehicles. Once autonomous cars make up a higher proportion of vehicles on the road, "you're going to start to see improvements," Handley said.

In the short term, Angelenos can take comfort in knowing it could always be worse. In London last year, drivers spent 101 hours stuck in traffic.
